PROJECTS

Don't Starve Game ([GitHub](#) | [Live Site](#))

May 2024

- Developed a web application using React.js to create a game, display character and recipe information, and functional store pages
- Passed down values from the parent component to the grandchild component using the createContext and useContext hooks
- Successfully fetched API data with a useEffect hook and used the map method to parse through and display the data as divs
- Integrated Stripe payment methods which will successfully accept a valid credit card and decline an invalid one

Food Delight Seafood Restaurant ([GitHub](#) | [Live Site](#))

April 2024

- Each of the pages contained form elements which were connected to the ElephantSQL database through JavaScript
- Created a server.js file which contained working codes of a CRUD server using Express package manager
- Each CRUD endpoints contained security checks which includes usage of Winston loggers for debugging
- Deployed API documentation page on Vercel and linked it to main restaurant webpage

Random Ranking Game ([GitHub](#) | [Live Site](#))

March 2024

- Developed a functional start page using HTML, CSS, DOM, and jQuery, with multiple div elements triggered by event listeners
- Successfully fetched and parsed through JSON data in JavaScript
- Assisted teammate with back-end development of game function using for loops and implementing parsed data from APIs
- Created an Easter egg animation for title screen using jQuery

WORK EXPERIENCE

Lake City International Farmers Market

Lake City, GA

Accountant

March 2023 – February 2024

- Managed and organized data for over 200 vendors using QuickBooks
- Efficiently created paychecks manually and electronically for entire store's inventory with 99% accuracy
- Developed extensive training manuals for future employees while in-training which improved employee onboarding time
- Trusted 100% to bring attention to owner and/or other peers regarding any unusual activities
